Top-Stays Lifting System

Dear Treasured Friend,

Take a quick survey of your own house. What do you see? Usually, the things observed are those readily apparent – the big pieces of furniture, attractive accent pieces, appliances and, possibly, some clutter around the house. There are no mistakes in recognizing these things, but what about those that are hidden? Oftentimes, objects that work or exist behind-the-scenes truly remain as such, glossed over and taken for granted, and more so for those silent, fuss-free types. But these workers that remain under the radar do just that because they work so well you hardly notice them.

As specialists in hardware solutions, **EXCEL** is one of the destinations for such products,

and has grown from a micro business to a full-fledged regional juggernaut. Serving as the trusted guide of home owners, they select and carry quality handles, knobs, hinges and other pieces and joints that enable home to function.

As of late, they are glad to announce the new entries to their portfolio – the DTC-S10 Series Full Extension Undermount Slides and DTC Double Wall Drawer System In Luxury White series. Hardly does anyone think of drawers, except when one bangs a finger by accident. But with these, that is unlikely to occur.

Should talk about Top-Stay introduction and the other 2 new products.

Emporium Black 엠포 리엄 블랙 Soft Closing Pneumatic Hydraulic Support Arm

This pneumatic support arm prides itself for its potential of amplifying the efficiency and outcome of your hydraulic lift seamlessly. Designed to leverage the productivity of hydraulic lift, this air operated intelligent device provides incredible power.

The competitive pricing of the arm ensures that everyone can purchase the same to ramp up the delivery potential of hydraulic lifts without having to be bothered by monetary considerations.

PIVOT-STAR Speed Adjustable Soft-Close Hinge

The PIVOT-STAR is an innovative technology hinge characterized by its fast-adjustable soft-close design. The door closing speed can be adjusted to suit different door sizes and/ or user preferences by turning the speed setting screw from “-” to “+”. This speed-adjustability feature makes the PIVOT-STAR stand out from other hinges that only allow users to activate or deactivate the soft-close function.

This above content need to rewrite as this content is copied from other websites.

Soft-Closing Double Wall System Series *With Crystals From Swarovski®*

DTC Double Wall Drawer System with crystals from Swarovski Introduction needed here. Dummy text below.

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Aenean commodo ligula eget dolor. Aenean massa. Cum sociis natoque penatibus et magnis dis parturient montes, nascetur ridiculus mus. Donec quam felis, ultricies nec, pellentesque eu, pretium quis, sem.

EXCEL-DTC S10 *Soft-Closing Full Extension Undermount Slides*

The big draw is the easy glide that the system has – and without any noise too. The zinc-plated mechanism of the S10 series is such that it allows an effortless open-close capability with a simple nudge. Its length measurement can vary from 250mm to 550mm, while its drawer slides is up to 16mm thickness. Also, it can carry a load up to 25kg and come with a locking device and damper. The best part is it is a tool-free installation or removal.

EXCEL-DTC D Series *In Luxury White*

Likewise, the Double Wall Drawer System is a soft-close kind and needless of tools. The load can carry a capacity of 40kg left or right. The technicalities may sound troublesome for the average home owner. Not to worry, though, **EXCEL** has it all figured out to give you a peace of mind throughout before and after it's installed.

EXCEL-DTC SQ Series
Top-Stays Series Lifting System

Agile and unconstrained, comfortable and elegant - an entirely new experience of the lift-up door

Wide application

Based on research about the use needs in various places such as the kitchen, living room, office and bathroom, the SQ series lift-up support can provide ideal opening and shutting effects for door panels with various dimensions and made of various materials.

Comfortable and elegant

At the same time that the ingenious appearance design adds points to the cabinet body, it also provides a personalised choice to customers.

Gentle and quiet

The SQ series lift-up support has added an adjustable speed function on DTC's widely praised damping system, and this makes it possible for all of the lift-up doors to be able to realise gentle and quiet closing.

EXCEL-DTC SQ Series Top-Stays Lifting System

A rigorous mechanical design and a superb manufacturing process enable the lift-up door to realise adjustable opening and hovering forces and closing speed, and this makes every lift-up door movement agile and unconstrained.

The SQ lift-up support lifts the single door upwards making it suitable for wall cabinets as well as high cabinets.

Place of application: Kitchen, living room, office and bathroom

Features

Easy to open

Opening angle 107°

Soft closing and stays at any desired angle

Seamless closing

Unique Adjustable soft-closing speed

Adjustable opening and hovering forces

Door position: 3D adjustable

Personal decorative cover (Black/Dark Grey)

- Opening angle 107°
- Silent and smooth closing
- Cabinet width up to 1200mm
- Cabinet height: 250-500mm
- Door thickness: 16-28mm
- Easy to open and stays at any desired position
- Adjustable soft-closing speed
- Adjustable opening and
- Snap-fit mechanism makes installation and dismantling very easy

Emporium Black **엠펙 리엄 블랙** Soft Closing Pneumatic Hydraulic Support Arm

It is a perfect companion for any hydraulic lift and can come in handy for various activities wherein the lift's performance needs an external fillip.

The arm would also relieve those who have been thinking of investing in a new or improved hydraulic lift as they have not been able to get the desired level of outcome from the existing one. With the aid of pneumatically operated support arm, your hydraulic lift would get a new lease of life.

Reliable, durable and safe to use; the arm would not fail to perform midway. The rated performance capacity of the arm has been arrived at after rigorous tests in unfavourable operating conditions. It is a real asset which is worthy of possession.

Features

For Cabinet doors, swinging it with force will gradually end up to a smooth, silent and effortless closure. The hinges and the damper work in supreme synchronization and completely integrates together to portray both style and technology into a top-quality mechanism – soft-closing hinge. DTC hinges combined with **EXCEL**'s well established quality control, gives the consumer new benefits and peace of mind. Every time a cabinet door is closed. They will be reminded by the brilliant quality of their furniture cabinets.

DTC *Inside*

How does DTC work in your design?

The aim was to extend an inspirational soft-closing and silence function.

The action of closing drawers is not just about noise reduction, it is about being an expressive experience. The result of these efforts comes from continuous improvements and developments of **EXCEL**.

Inside DTC it has a high quality damper technology organism. Flexible discs enable this effect by regulating the flow speed of the medium in DTC based on force. Therefore, it does not matter whether the pull-out is heavy-laden or empty, pushed gently or with force.

EXCEL-DTC D Series

Soft-closing double wall systems in luxury white D Series is our newest solution for stylish pull-out designs. Based on Luxury White Series side profile, D Series allows endless mixture and design to meet the utmost expectations. Avoid shelves in lower cabinets for the reason that drawers and pullouts present straightforward access and overview, and you keep away from straining your back. Even when the DTC drawer systems are fully loaded, it remains to run smoothly and quietly. Whether the drawers are empty-loaded or heavily loaded, pulling and pushing, opening out or closing in, it's effortless.

ITALY FGV AEROBUS D40 LIFT UP

Stay-Left+Right Door

The aerobus is a compact, aerodynamic product that offers optimal flexibility in usage of door mounted cabinets. It comes accompanied with a click-on door fixture that causes the aerobus to align itself to door in perfect symmetry without requiring any hinge.

Assembling of the product can be done easily in rapid manner. Aerobus allows for vertical opening of cabinets and offers maximal access to the space inside the cabinets, irrespective of their sizes.

It is a non-intrusive system that offers least obstruction to your usage of the cabinet for various purposes. The compact nature of the product allows it to take-up minimal space for mounting inside the cabinet.

The inbuilt damper allows the cabinet door to be closed softly without causing any noise jarring to the ears. Apart from muffling closing sound, the damper allows for controlling the degree to which the door is swung open in the vertical direction.

The aerobus system has been meticulously engineered to ensure that all adjustments are done accurately for hassle free service. The adjusters in the aerobus can be tweaked to comply with the requirements of doors of varying weights and sizes. The mounting allows doors to flexibly open up to desired angles for optimum user convenience. The freewheeling nature of the aerobus is compatible with the dynamics of the door and both complement each other for incredible performance.

The door does not get closed abruptly if the hand pressure is released. The aerobus applies adequate pressure to hold back the door in position and induce gradual closure without any discordant noise. Any stabilization bar or other intervention is not required to streamline the performance of the aerobus. The silver coating renders it resistant to rust or corrosion. Installation on the left and right edges of the cabinet is really easy and can be done conveniently.

Italy FGV Aerobus D40 Lift Up (Stay-Left+Right Door)

EXCEL-FGV AEROBUS D40 : \$43.00
